

FOR IMMEDIATE NEWS RELEASE

Artyzen Grand Lapa Macau Receives Carbon Disclosure Award – Macau at ESGBusiness Awards 2026

*Recognising Continued Commitment to Low-Carbon Operations
and Sustainable Hospitality*

[Macau, 25 September 2026] Artyzen Grand Lapa Macau has received the Carbon Disclosure Award – Macau at the ESGBusiness Awards 2026, recognising the hotel's **Low-Carbon Strategy Project** and its continued efforts to improve energy and water efficiency, reduce waste, recover resources and strengthen environmental performance through data-driven management.

The award reflects Artyzen Grand Lapa Macau's longstanding commitment to integrating sustainability into its daily operations. The hotel's Low-Carbon Strategy Project covers energy and water management, waste reduction, emissions monitoring and operational improvements, with environmental performance tracked against the hotel's carbon emission intensity target.

Among the measures implemented, the hotel converted its steam boiler from diesel to natural gas and upgraded selected air handling units with variable speed drives and Aurabeat filtration systems to improve energy efficiency. Guestroom minibar refrigerators were also replaced with more efficient models using lower-global-warming-potential refrigerants, while a high-efficiency water-cooled chiller using a lower-impact refrigerant was introduced for the centralised air-conditioning system.

Water conservation and resource recovery form another part of the hotel's environmental approach. Overflow and blowdown water from the swimming pools is treated and redirected for guestroom toilet flushing, while flow regulators and water restrictors help reduce water consumption. The hotel has also reduced single-use materials by replacing single-use plastic water bottles with reusable glass bottles and introducing umbrella dryers in place of disposable plastic umbrella bags, while retaining artwork and furniture from previous renovations and maintaining recycling programmes for materials including glass, oil, batteries and linens.

Sustainability considerations also extend to the hotel's food and procurement practices. A plant-based menu is available across the hotel's restaurants, while cage-free eggs are used as part of the hotel's responsible sourcing efforts. The hotel has also introduced biodegradable utensils, refillable guest amenities and recyclable coffee capsules, alongside electronic pay slips to reduce paper consumption. These initiatives

form part of the hotel's wider effort to make more responsible choices throughout its daily operations.

Environmental performance is monitored through the hotel's Environmental Management System (EMS) and TT-Green ESG performance platform. Utility consumption and greenhouse gas emissions are tracked through these systems, with senior management and a cross-functional ESG team reviewing performance and identifying opportunities for continued improvement.

The latest recognition adds to a series of sustainability milestones achieved by Artyzen Grand Lapa Macau. In 2026, the hotel received the **Silver Award at the Macau Green Hotel Awards**, acknowledging its continued implementation of environmental protection measures. The hotel was also honoured at the **Inaugural Carbon Awards 2026**, presented by the GBA Carbon Neutrality Association, for its ongoing efforts in low-carbon transformation and carbon management.

In 2025, Artyzen Grand Lapa Macau became the **first hotel in Macau to achieve LEED Gold Certification under the LEED for Operations and Maintenance (O+M): Existing Buildings**, an internationally recognised certification awarded by the U.S. Green Building Council (USGBC). The hotel also received the **Gold Award for Environmental Performance** at the 2025 Business Awards of Macau, recognising its commitment to sustainable hospitality and environmental stewardship.

Beyond its operations, Artyzen Grand Lapa Macau continues to engage colleagues, guests and the wider community in environmental initiatives. In addition to participating in the annual global **Earth Hour**, the hotel celebrates **World Earth Day** through community activities, including tree planting initiatives, encouraging collective participation in environmental protection and awareness.

Reflecting on the award, **Mr. Rutger Verschuren, Area Vice President, Macau and Hengqin of Artyzen Hospitality Group and General Manager of Artyzen Grand Lapa Macau**, said: "Carbon disclosure is not simply about reporting numbers. It gives us a clearer understanding of how our hotel operates, where our environmental impact comes from, and where we have opportunities to improve. For an established hotel like Artyzen Grand Lapa Macau, sustainability is about continuously finding better ways to operate, improving the systems we have, using resources more responsibly and making thoughtful choices that can deliver long-term impact.

"Our recent awards across 2025 and 2026 reflect different aspects of this journey, from LEED certification and environmental performance to the Green Hotel practices, carbon management and disclosure. We see these milestones not as a destination, but as a framework that challenges us to keep improving."

“As a hotel that has been part of Macau for more than four decades, we also believe our responsibility extends beyond our doors. Through initiatives such as Earth Hour and World Earth Day, we hope to encourage our colleagues, guests and community to take part in creating positive change. For us, sustainability is ultimately about caring for the place we call home and making better decisions today for a better tomorrow.”

Artyzen Grand Lapa Macau is a classic urban resort deeply rooted in Macau’s cultural fabric and known for its distinctive blend of Portuguese architecture, Macanese charm, and heartfelt hospitality. Managed by Artyzen Hospitality Group, a wholly owned subsidiary of Shun Tak Holdings Limited, the hotel’s sustainability efforts align with its philosophy of “Emotional Wisdom” and the Artyzen 3Cs — Connect, Care and Celebrate.

Through continued improvements in environmental performance and meaningful engagement with the community, Artyzen Grand Lapa Macau remains committed to evolving responsibly while contributing to a more sustainable future for Macau.

The ESGBusiness Awards recognise organisations that demonstrate outstanding commitment and achievement in environmental, social and governance (ESG) practices, celebrating those leading the way in building a sustainable future.

Artyzen Grand Lapa Macau's Ongoing Commitment to Sustainability

Artyzen Grand Lapa Macau is a timeless urban resort where rich cultural stories, heartfelt connections, and refined comfort come together. Managed by Artyzen Hospitality Group, a subsidiary of Shun Tak Holdings, the hotel offers a unique blend of accommodations, restaurants, wellness experiences, and event spaces inspired by the soulful character of Macau.

At the heart Artyzen Grand Lapa Macau, sustainability is not just a guiding principle—it is a practice woven into every detail. From reducing energy use and food waste to promoting low-carbon lifestyles, the hotel continues to lead by example in responsible hospitality. We keep exploring and implementing the latest technologies to reduce electricity consumption and carbon emissions, further minimising our carbon footprint drastically.

Since its renovation in 2019, the hotel has taken bold steps toward eco-friendly initiatives. Single-use plastics have been significantly reduced, with bathroom amenities and guest supplies replaced by sustainable alternatives. Biodegradable straws have replaced plastic ones, and all takeaway packaging is plastic-free.

The hotel was also among the first in Macau to install the Swedish Nordaq water bottling system, a premium, eco-friendly brand—trusted by world-class hotels, chefs, and sommeliers—into the guest experience. This not only reduces plastic waste but also elevates the guest experience with high-quality, purified water, a sustainable luxury.

The hotel's environmental commitment extends beyond its walls through active participation in community-led green programs such as Earth Hour, Green Week, red packet and mooncake box recycling, and tree planting on World Earth Day in collaboration with the IC2 organization. In alignment with Artyzen Hospitality Group's "No Shark Fin" policy, only sustainably sourced seafood is served in all dining venues.

Recently, the hotel launched a Green Menu to promote mindful dining and eco-conscious living to support a healthier planet. These continuous efforts have earned Artyzen Grand Lapa Macau a series of recognitions, including the LEED Gold Certification under LEED for Operations and Maintenance (O+M): Existing Buildings, awarded by the U.S. Green Building Council (USGBC), making it the first hotel in Macau to achieve this certification; the Gold Award for Environmental Performance at the 2025 Business Awards of Macau; the Silver Award at the Macau Green Hotel Awards; and the Carbon Disclosure Award – Macau at the 2026 ESGBusiness Awards, recognising the hotel's dedication to a greener, more responsible future.
